Babcock University
B.S. Software Engineering

June, 2023
Ogun State, Nigeria

WORK EXPERIENCE

DarktanProp.com
Frontend Developer
Remote

Mar. 2024 – Oct. 2024

- [DarktanProp.com](#) is an all-in-one website for landlords and tenants to simplify property management.
- Implemented frontend components for comprehensive property management, translating designs into responsive user interfaces for landlords, tenants, and real estate professionals.
 - **Stack:** JavaScript (React); SCSS; Vercel; Git;
- Developed interactive dashboard interfaces, payment system frontend integration, and document sharing functionality.

Nigeria Data Protection Commission (NDPC)
Software Development Intern

Nov. 2023 – Apr. 2025
Abuja, Nigeria

The NDPC is Nigeria's statutory regulatory body responsible for enforcing data privacy laws

- As Software Developer Intern, I developed multiple web applications and digital solutions for Nigeria's data protection regulatory body, supporting internal operations and inter-agency collaboration projects.
 - Built comprehensive digital library system for commission resources and documentation, improving information accessibility and knowledge management
 - Developed internal IT helpdesk application enabling employees to efficiently submit and track IT-related complaints and support requests.
 - Collaborated with Small and Medium Enterprises Development Agency of Nigeria (SMEDAN) to create visitor registration web application, streamlining front desk operations and visitor management processes
 - Technologies used: HTML/CSS/JavaScript, React, NodeJs, ExpressJs, MongoDB.

National Information Technology Development Agency
Software Development Intern

Jan. 2022 – Jun. 2022
Abuja, Nigeria

NITDA is Nigeria's federal government agency responsible for coordinating IT development and implementing national technology policies.

- As Software Developer Intern, I developed web applications and conducted quality assurance testing for government digital platforms, contributing to secure payment processing and streamlined HR operations.
 - Created comprehensive test suite for National Universities Commission payment platform, identifying and documenting critical system vulnerabilities before production deployment.
 - Built in-house internship screening web application that automated candidate pre-interview processes, reducing manual HR processing time and improving application workflow efficiency
 - Technologies used: HTML/CSS/JavaScript, React, Cypress.
